

02-278 The attorney's general office has just advised me that my telephone number could be given out in the near future. I pay to have my phone number unlisted due the endless harrassing calls.

I am on the Do Not Call Registry also. I like my privacy, peace, quiet here at home. If I want a product I seek the information I need. I don't want any one calling me a zillion times a day invading my privacy and interrupting my rest as I'm disabled. This is truly unacceptable for we the people to finally get what we the people want and have some organizations all in their best interests of profit and capital gain rule to take what we the people want.

Our home life should be private without unwanted communication.

A family would like to sit at the diner table eat a meal and discuss family issues, not forced advertising via the telephone.

Good Day.

Mona D. Claxon
